

Our company is here to design and build an environment that truly fits into your life. To do this effectively we include you, and your family into our design process. It is most important that ideas and information be exchanged up front, completely and accurately from all parties. This diagram shows you what to expect when we are hard at work for you.

STAGE 1 CONCEPTUAL DESIGN

Your initial contact with New Dimension Building will lead to an introductory meeting at your residence with one of our salesman. All relevant parties including the homeowner, and medical professional exchange ideas and information on scope of your project. During this stage of the process products, and construction methods will be presented to you.

NDB Salesman, Homeowner/Patient, & Medical Professional

STAGE 2 CONSTRUCTION DESIGN

After we have learned all there is to know about your structure and situation our team will take the time to produce architectural drawings, 3d images, and specifications for your project. Permits will be obtained, and our team will schedule our craftsman and contracting partners. When we are finished with our planning we will present documents to you for final approval.

NDB Salesman, Drafter, Homeowner/Patient, & Medical Professional

STAGE 3 CONSTRUCTION

Stage 3 involves what you expect from a construction company. Our Craftsman will complete your project to plan and to schedule. Our Salesman will periodically inspect progress and a Project Manager will be assigned to your job to manage time and resources.

NDB Salesman, Project Manager, Homeowner, & Craftsman

STAGE 4 REVIEW

Our review process is as important as anything else we do. Your salesman will inspect the completed work and verify that all work has been completed to plan. All involved parties are asked to participate. In-services may need to be scheduled for equipment demo, and safety information.

NDB Salesman, Homeowner/Patient, & Medical Professional
